Noorullah Ahmadzai

DEVOPS ENGINEER · FULL-STACK JAVASCRIPT ENGINEER

Kabul, Afghanistan · info@noorullah.dev · github.com/noor-codes · x.com/noor_codes

PROFILE

Full-stack JavaScript engineer turned DevOps engineer, with a track record of owning products end-to-end — from frontend architecture and design to the infrastructure that runs them. Experienced across the full lifecycle of a product: building and designing applications, then deploying, securing, and operating the systems behind them. Comfortable moving between development and operations, automating routine work, and troubleshooting issues wherever they arise. Fluent in English, Pashto, and Dari.

TECHNICAL SKILLS

DevOps & Cloud Cloud resource management, Linux server administration, hosting & server management, Coolify, Dokploy, basic IT support & troubleshooting

CI/CD & Containers Version control (Git/GitLab), build tools, artifact repository management, GitLab CI, Jenkins, Docker, container orchestration with Kubernetes, monitoring

Infrastructure as Code Terraform, Ansible, Bash scripting

Security & Networking Secure VPN setup & management, Cloudflare (DNS/WAF) management, mail server administration

Backend Development Node.js, Express.js, NestJS, MongoDB, PostgreSQL, Prisma, TypeORM, KeystoneJS, REST API design, data migration, rich knowledge of NPM packages

Frontend Development JavaScript, TypeScript, React, Next.js, TailwindCSS, Figma

Frontend Specialties Frontend architecture, performance optimization, state management, design systems, networking/API integration

Languages English (fluent), Pashto (native), Dari (native)

PROFESSIONAL EXPERIENCE

DevOps Engineer

June 2026 – Present

MellatPay

- Manage cloud resources and hosting/server infrastructure supporting production fintech applications.
- Set up and maintain secure VPN access and Cloudflare configuration (DNS/WAF) for company systems.
- Administer Linux servers and mail servers, ensuring uptime, security, and reliability.
- Build and maintain CI/CD pipelines using GitLab and Jenkins to automate build and deployment workflows.
- Containerize and orchestrate application services using Docker and Kubernetes.
- Automate infrastructure provisioning and configuration management using Terraform and Ansible.
- Write Bash scripts to automate routine operations, deployments, and system maintenance tasks.
- Provide basic IT support and troubleshoot production and infrastructure issues.

Frontend Developer

May 2024 – June 2026

MellatPay

- Designed, developed, and maintained MellatPay's websites and user-facing dashboards.
- Owned end-to-end frontend design, development, and integration across 6 production dashboards.
- Built and maintained reusable UI components and design systems using React, Next.js, and TailwindCSS.
- Integrated REST APIs and backend services across dashboard products.

Frontend Developer
December 2023 – May 2024

Aseel

- Owned the entire frontend development lifecycle end-to-end, from architecture through deployment.
- Architected the frontend application structure for scalability and maintainability.
- Optimized frontend performance, including load times and rendering efficiency.
- Owned state management architecture across the application.
- Handled the networking/API integration layer connecting frontend and backend services.
- Contributed to UI/UX design and design system implementation.

Full Stack Web Developer
September 2021 – September 2023

Gamerina SRL and WAM.app · Cluj-Napoca, Romania

- Built full-stack web applications and features using React and Next.js on the frontend, with TailwindCSS for styling and responsive UI.
- Developed backend services and APIs using Express.js and KeystoneJS, with MongoDB and Prisma for data modeling and persistence.
- Designed and consumed REST APIs to connect frontend interfaces with backend services.
- Performed data migration tasks as part of application development and maintenance.

Front End Web Developer
October 2020 – September 2021

Risa Hall Web Inc · Colorado, USA

- Developed frontend components and interfaces for client web applications.
- Implemented responsive, cross-browser user interfaces from design mockups.
- Collaborated with backend developers and designers to integrate REST APIs and maintain consistent UX.
- Participated in code reviews and followed component-based architecture practices.

English Instructor
2014 – 2016

Language School · Kabul, Afghanistan

- Taught English language courses to students at a range of proficiency levels, covering grammar, comprehension, and spoken fluency.
- Developed strong communication, presentation, and explanation skills that continue to support technical collaboration and documentation work.

EDUCATION

Bachelor of Computer Science
2016 – 2020

Kardan University

Completed a four-year degree in Computer Science at one of Afghanistan's leading and most highly regarded universities. Coursework covered software engineering, programming fundamentals, databases, and computer systems.

English Certificate
2012 – 2014

Language School

Completed an intensive English language program taught through modern communicative methods, with dedicated emphasis on advanced grammar and spoken fluency. Built the professional English proficiency later applied in international roles and technical instruction.

High School Diploma
2001 – 2013

Ghazi Ada High School

Completed the full national secondary education curriculum, with a focus on mathematics and the sciences. Graduated with the academic foundation required for admission to university-level computer science study.

ADDITIONAL SKILLS

Soft Skills Fluent English, presentation, communication
